📅 jan 2022 – Apr 2022

certificate url :
https://certificate.codingninjas.com/view/4950a721218a102c

Frontend development | FullStack Web Developemet

📅 Apr 2022 – Jun 2022

certificate url :
https://certificate.codingninjas.com/view/411df3ce6d81581e

Node, Express

📅 Jun 2022 – Sept 2022

certificate url :
https://certificate.codingninjas.com/view/b259b1edbc13daf2

React js

📅 Sept 2022 – Nov 2022

certificate url :
https://certificate.codingninjas.com/view/ed1776ea1325947b

SKILLS

Java , OOPs
JavaScript, HTML, CSS
React Js, Node(Express)
Tailwind CSS
SQL,MongoDB
Data Structures and Algorithms
Database Management System

PROJECTS

Expense Tracker

- The main aim of this project was to track the expenses of particular user
- A user have to add the expenses details whenever he/she made any transactions
- A user can track his/her expenses of last 5 years.
- This project was implemented in JSX, CSS, JavaScript, React.

Food Ordering Website

- This project was just like swiggy and zomato(Ecommerce website)
- A user can order food of his/her choice.
- There is options for managing Cart and favourite list.
- Tech stack used - JSX, CSS, React.

IMDb Clone Website

- I have created a IMDB clone app using only vanilla js and TMDB Api.
- features that this app includes is –
- Homepage (user can search any movie (internally it will call API for query with db))
- Moviepage (basically it will show the meta data of the movie like - name, photo, overview, ratings etc.)
- Favorite Moviepage(it will display all fav movies. user can delete movies from this page)
- Tech stack used - HTML, CSS, Javascript

Music Player

- This is a Responsive Frontend Application with awesome animations
- A user can see the list of music, singer , singer's detail
- this UI kept detail of latest release, popular artist, latest english and hindi songs
- A user can find music on the basis of music name or singer name
- Tech stack used - HTML, CSS, Js

Node-ToDo

- This project was for managing a To Do list for a particular user
- This project was implemented with the help of Node, Express, Mongo db
- A user can do CRUD operation on list.
- I have used HTML, CSS, JavaScript, Express and Mongo db for this project.
